Feed Mill Manager

A major feed manufacturer in Egypt is searching for a feed mill manager to manage its new, state of the art, 135 tons per hour feed mill. The feed mill is intended to manufacture poultry and aquaculture feeds, both bulk and bagged.

Job responsibilities:

- Manage a staff of up to 200 people.
- Coordinate production, distribution, and warehousing of raw materials and finished feed.
- Schedule and monitor daily production, including running ton totals, ordering raw materials and inputs, and scheduling production.
- Monitor and manage quality of all ingredients, intermediate products and end products, and implement a full QA and QC scheme.
- Develop and oversee plans for efficient use of materials, machines and human resources.
- Review production costs and product quality, and modify production and inventory control programs.
- Review and monitor government and local permits and approvals, as well as comply with all government regulations.
- Prepare and monitor annual budget in accordance to Company guidelines.
- Maintain a clean and safe work area at all times.
- Participate in company and department safety program.
- Comply with Company Policies and Procedures.

Qualifications:

- Education: BSc in an engineering or science discipline.
- Experience: Minimum 15 years total work experience, minimum 4 years experience as a top manager of a large-size feed manufacturing facility.

Benefits:

- Generous salary package, paid net of any local taxes
- Accommodation for person or family paid by the company
- Vehicle provided by the company, fuel paid for by the company
- Mobile phone line paid for by the company
- One round-trip flight ticket to home country annually per family member, for a maximum of 4 members.

Job location:

Sadat City, Egypt

How to apply:

Interested candidates should send their updated resume mentioning "Feed Mill" at subject line to careers@dakahlia.com
