

A COMPLETE LINE OF INNOVATIVE SOLUTIONS TO ENHANCE PERFORMANCE AND MAXIMIZE RESULTS

DI Fans

Powerful, Efficient Ventilation. Longer Life Span.

DI Fans deliver increased longevity and energy-efficient performance for precise, powerful and affordable ventilation.

The 55 inch DI Fan with variable speed option was designed to deliver a high Air Flow Ratio (AFR) for lower energy costs. Its fiberglass composite construction won't rust or corrode – significantly increasing fan longevity for an improved ROI.

The 36 inch DI Fan delivers the same level of performance, convenient quick change belts, and maintenance-free, high efficiency motor—but in a smaller package.

Experience exceptional ventilation performance with decreased energy costs with DI Fans

DI Nest-O-matic

No Slats, More Eggs, Better Airflow

The uniquely designed DI Nest-O-matic is poised to revolutionize the breeder industry with its no-slat design—saving up to 10 broken eggs per hen. The nest's spacious interior enables better air flow for drier litter and cleaner eggs, and also promotes improved fertility and hatchability. Improved ventilation decreases ammonia levels, thereby enhancing animal welfare, and the no-slat design drastically reduces labor when cleaning out between flocks.

*Maximize scratch area
with the slatless design
of the DI Nest-O-matic*

DI Drive

Complete Ventilation Solutions, Worry-Free Ventilation Control

The DI Drive Curtain and Vent machines deliver maximum power and unmatched durability for reliable control of your ventilation program. The Standard and G3 DI Drive models open and close curtains and vents with precision using a sealed, lubricated-for-life gear that requires minimal maintenance and nylon belts that provide greater longevity.

Gain ultimate control of ventilation with the most powerful curtain/vent machine available, the 450 Nm DI Drive (available with potentiometer)

Enjoy the same durability and reliability in environments that don't require maximum power with the G3 models (available with potentiometers); 150, 250 and 450Nm

diDrive

DI Tunnel Shutters

Smooth Operation. Maximum Insulation.

DI Tunnel Shutters are the optimal solution for allowing smooth laminar air flow into a house with no door turbulence. The 2-inch-thick coated-galvanized steel shutters are insulated with foam-filled expanded polystyrene to deliver an R-9 insulation value that drastically reduces energy costs.

Improve airflow patterns and speeds, and boost fan efficiency

DI Vent

Gain Control and Save Energy with Smarter Inlet Ventilation

The DI Vent brings improved performance and decreased energy costs to house ventilation with its durable construction, larger inlet opening and R-9 insulation value. With three innovative drive system designs, the DI Vent system can deliver labor-saving automation for smarter inlet ventilation.

Angled lip and adjustable air baffles promote excellent airflow

DI Range Free

Make Free-Range, Maintenance-Free

Controlled with a torque tube drive system, the DI Range-Free Doors provide a maintenance-free solution for free range production that keeps energy costs low with an R-9 insulation value and high compression seal.

Simplify free-range operations with automated, reliable control

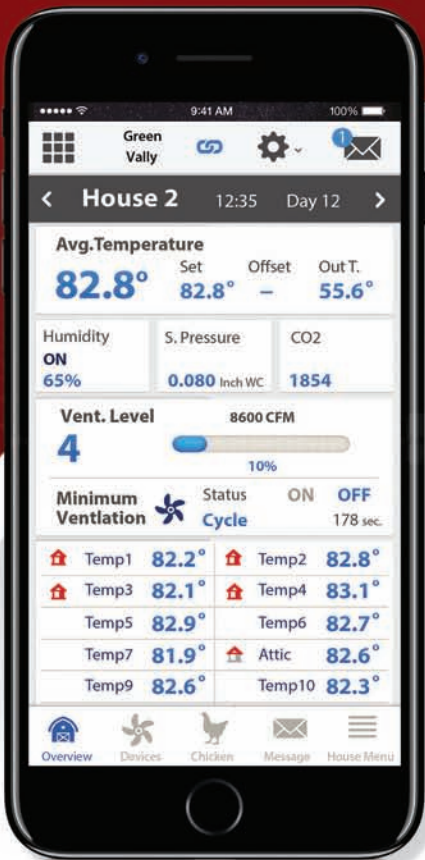

ROTEM

Industry Leading Control and Management Solutions

Rely on Rotem to be one step ahead in supplying comprehensive solutions that deliver the ultimate level of convenience, control and reliability.

Stay in Touch

Gain complete control of your house environment—from anywhere—with the Rotem Communication Package. Our line of controllers enable advanced environmental management while the Communicator and mobile or desktop application delivers real-time data on house conditions, performance and more. Stay in touch and stay in control with Rotem.

Gain real-time control with the RotemNetWeb application

Platinum Plus, a first class controller with minimum programming

Quickly collect comprehensive data with the Rotem Communicator

ROTEM

Be Prepared

Protect yourself from controller failure and ensure essential services continue to support animal survival with Rotem's line of backup units. With no required software, Rotem backups provide protection under any situation—even during power disruptions.

Weigh In

Know how your birds stack up with scales and scale sets. Collect weight, daily gain, uniformity and more on any bird.

Always stay in control with the Rotem RBU-27 Backup

Accurately weigh every bird with the RBS-2 Chicken Weighing Platform

Quickly collect comprehensive data with the RSC-2SE Live Bird Scale Center

PLASSON

Revolutionary Watering and Feeding Systems

Trust Plasson to apply 50 years of experience in the development of intuitive, dependable and efficient watering and feeding solutions to help every poultry operation thrive.

Optimized Water Management for Peak Performance

The Water on Demand is the industry-leading pressure management solution that enables easy control and management of every house drinker line. Precise, continuous control means drier floors, bigger birds through optimal water delivery, and significant labor savings from eliminating the need to adjust each nipple line.

For even greater control, the Water on Demand Pro automates precise water management with its ability to program and monitor pressures for the entire growout—onsite or remotely.

PLASSON

24/7 Pressure Management

Take control of water pressure with the Water on Demand and pressure reducer

PLASSON
Livestock

PLASSON

Optimal Water Delivery for Every Bird

Plasson drinking systems provide the constant supply of fresh water that birds need to maximize performance. With nipples designed to provide the maximum amount of water from any angle—while keeping litter dry—and options tailored to your flock's flow rate needs, Plasson drinkers help to deliver a healthier, more uniform flock with lower mortality.

Satisfy the water needs of every broiler, breeder and turkey with the Plasson line of drinkers

Intelligent Feeding Systems for Bigger Birds

By providing easy feed access from start to finish—from day one—the innovatively designed Plasson line of feeders consistently helps producers to experience lower feed conversion rates and increased weight gain. The control unit's low volume ensures frequent operation, thereby stimulating feed consumption, and the patented self-adjusting feed level system reduces labor by eliminating the need to adjust levels during growout.

Increase weight gain in broilers and turkeys with the Plasson line of feeders.

TEFEN

The Perfect Mix of Affordable, Accurate and Durable

For water-distributed treatments, Mix-Rite Medicators deliver precise, reliable dosing that's independent of water pressure and flow variations. With its minimal maintenance requirements, Mix-Rite is known for having the lowest cost of ownership in the industry.

MixRite®

Mix-Rite—reliable dosing everytime

Automated, Reliable Control of Water Additives

The InjectRite Peristaltic Pump offers a fully automatic proportional dosing ratio between the mainline and the additive. With an injection frequency eight times greater than the competition, InjectRite quickly adjusts to waterline flow changes, enabling highly accurate, smooth blending with repeatability.

InjectRite™

Enjoy automated control with minimal maintenance with InjectRite

DI Water Meter

Water Usage: An Accurate Reading on Flock Health

A decrease in water consumption can often mean trouble. The Arad M multi-jet magnetic water meter provides frequently updated data on water consumption, enabling you to make fast, smart decisions for your flock. Engineered to give accurate readings as low as 10 gallons per hour and as high as 1,300 gallons per hour, Arad meters feature a patented frost protection device for dependable performance even during cold weather, and its high sensitivity allows for quick detection of malfunctions. Plus, the Arad M meter with pulse can be connected to your Rotem house controller from precise water management.

Ensure precise water management by combining the Arad M Water Meter and your Rotem house controller

DI Bird Removal

Ease Workload, Minimize Mortality Exposure

The DI Bird Removal system enables one-step handling when removing mortality—significantly decreasing workload and reducing flock exposure to dead birds. The maintenance-free conveyor can easily be adjusted for height during the flock and it features an automatic bird counter and mortality logging capability.

Simplify mortality removal with the DI Bird Removal system

EXCELLENCE THROUGH INNOVATION

For nearly five decades, the mission at Diversified has remained steadfast—keep a customer for life. Our success in that mission is the result of our unwavering dedication to innovation.

As production needs shifted over the years, we continuously rose to the challenge—diligently working to provide affordable, durable and effective solutions to maximize performance and minimize costs. Today, the Diversified name is synonymous with quality and performance. Our long-term success can be attributed to our consistent delivery of eloquently designed products that add value throughout the production cycle.

SERVICE THAT DRIVES SUCCESS

Behind each quality product stands the Diversified family—people who put relationships first, people who value integrity and drive innovation in everything they do.

Our high level of customer satisfaction flows from our hassle-free customer experience—from sales and training to installation and service. Our strong relationships are built on a foundation of trust and respect. We understand that by delivering on our promises we guarantee continued mutual success. Our company leaders respect the role of every employee and work to enable each person to excel. This unwavering respect and support is indicative of how Diversified treats the industry overall.
