

The Leaders in Technical Support

AEGIS® Risk Reducer

For use in Aegis-RP Bait Stations

The Aegis Risk Reducer can lessen the rodenticide crumb-out outside of an Aegis-RP bait station and reduce the risk of bait exposure to non-target animals.

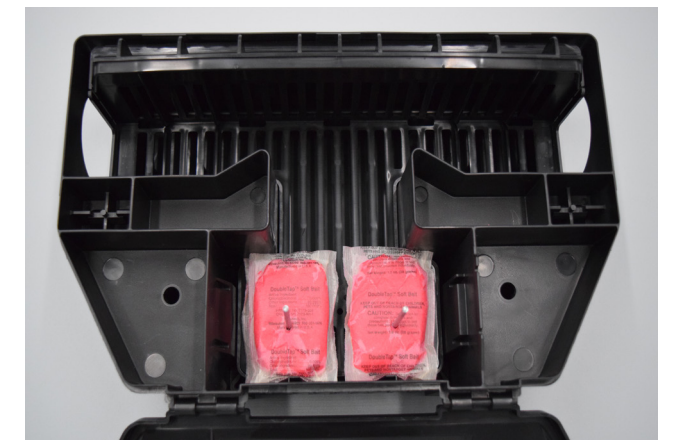

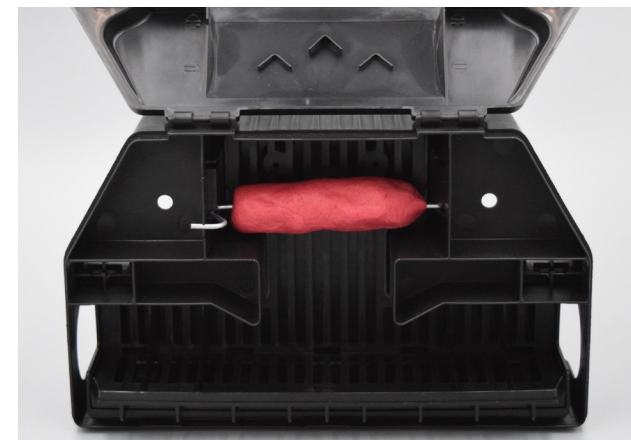

Not sure what to look for during a facility inspection? Liphatech is the leader in rodent control technical support! Contact Jason Price, Liphatech's National Technical Support Manager.

Jason is a licensed pesticide applicator and spent 19 years working in live poultry production prior to joining Liphatech. He provides on-site inspections at farms, feed mills, and other live production facilities where rodent problems persist. In addition to facility inspections, Jason also offers technical classroom and field training for employees.

Features & Benefits

Decrease the risk of rodent baiting in your cage-free production operation

Barriers help brush crumbs from the underbelly of rodents before exiting and create another blockade to stop bait waste from leaving the station

For mice: knock-outs create another barrier for crumbs

For rats: remove to enlarge entry/exit points

Sold in cases of 6 Risk Reducers

Helps prevent rodenticide crumb-out in your production operation

Quickly clean out & service by removing from the station

Can be used vertically or horizontally

Coming Fall 2021
Check with your Liphatech sales rep for availability.

Holds bait crumbs & paper shreds
